- Sample SDP/RFCOMM applications

Supports Windows 98 SE, Me and 2000

BluePC SDK Benefits

- Proven Certified Solution
- Faster time-to-market
- Easy Customization
- Reduced Risk

Software

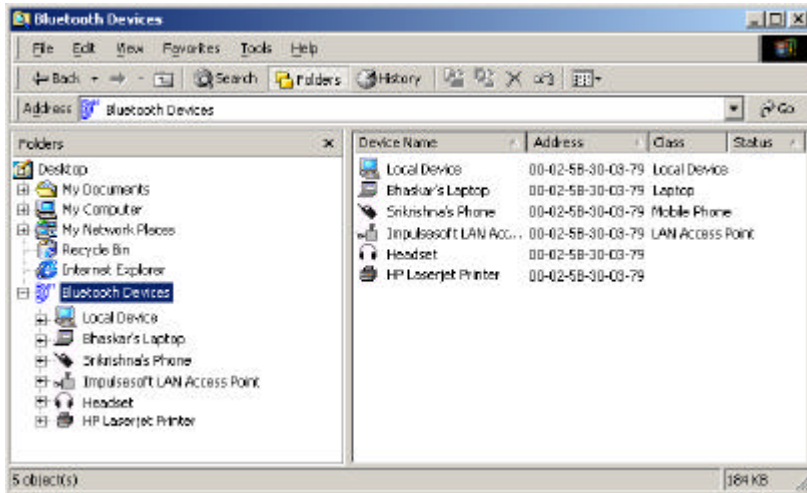

• Systems

• Services

BlueExplore™

BluePC™ SDK provides you with BlueExplore, a Windows Explorer extension. Similar to the Windows Network Neighborhood, BlueExplore shows all the Bluetooth devices in the radio neighborhood along with a list of services provided by the Bluetooth devices.

BlueExplore is an intuitive application that allows you to quickly discover other Bluetooth devices within the range, identify services and map to the required services as well.

BlueConfig™

BlueConfig is a configuration utility shipped with the BluePC™ SDK. Whenever Bluetooth hardware is connected to a BluePC™ SDK installed computer; the BlueConfig icon is displayed in the system tray.

BlueConfig allows you to:

- Set local Bluetooth device properties
- Associate services available on a computer to a communication port
- Displays services provided by computers that are available to other users.

Innovating Together

Impulsoft Private Limited is a supplier of application-specific software, systems and services for short-range wireless solutions. Impulsoft's products and system integration services enable OEMs to bring wireless solutions to market faster.
